Subject: - Appreciation Letter for developing the Aqua Penetracao Concrete Permeability Testing machine as per DIN 1048 part 5

Dear Mr. Bharti,

I am impressed with your product Aqua Penetracao. It can be used in different research projects in Material Research laboratory in the Civil Engineering Department at IIT Delhi; and we have enlisted in our M-Tech Practical laboratory course also.

It will be useful in determining the relative permeation quality in the context of long term performance of concrete and also in judging effectiveness of waterproofing products on the basis of permeability of concrete.

It will be efficient also in suggesting the enhancement of performance of different types of waterproofing products.

Again, I congratulate your team which came up with a great product idea; it can make a compelling business product in waterproofing and durability of concrete marketplaces.

With best regards,

Dr. B. Bhattacharjee
