Ref.: Water Permeability Testing Machine for Concrete "Aqua Penetracao"

Dear Mr Bharti:

We are glad to have received the Aqua Penetracao equipment, for water permeability measurements in concrete as per DIN 1048 Part 5 and BIS- 1881 Part 122, from Cortex Construction Solutions. The equipment is being used in the Construction Materials Laboratory of the Department of Civil Engineering of IIT Madras for research and instructional purposes. The equipment will be useful in our ongoing projects on the determination of the permeability of concrete and repair materials.

We will provide you with feedback as we continue to use the equipment and look forward to collaborating in further developments along these lines. We will acknowledge the use of the equipment in research and technical publications with due credit to your company, as appropriate.

With best regards,

Sincerely,
